

**2017-2018**

*October Meeting Notice*

## **Minnesota Geotechnical Society**

### **Stabilized Full Depth Reclamation & Soil Stabilization**

**Mr. Dan Schellhammer, PE**

Stabilized Full Depth Reclamation (SFDR) and soil stabilization are two construction techniques that can be utilized to modify the physical and chemical properties of in-place materials. These techniques, when used at the right time and right place can help to reduce the duration and costs of construction, reduce the cost of long term maintenance, and extend the life of the pavement system. The techniques create a stable, durable and stout stabilized layer that allows for engineers to utilize thinner surface treatments.

The presentation will detail the processes used for each of the techniques and highlight the different stabilization additives that are available. The presentation will also discuss the selection of projects, best practices and provide a market summary.

**Date:** Wednesday, October 11th, 2017

**Location:** Rose Vine Hall (downstairs at Grumpy's Bar & Grill)  
2801 Snelling Ave. N., Roseville, MN

**Time: 6:00** Social Hour – Sponsored by Midstate Reclamation & Trucking, Inc.

**7:00** Dinner – Buffet Style:  
Pulled Pork or Chicken Sandwich buffet with salad and a side. Cookies and Coffee desert. – \$30.00

**8:00** Presentation – Mr. Dan Schellhammer, PE, Stabilized Full Depth Reclamation & Soil Stabilization (One professional development hour toward continuing education requirements for Professional Engineers is available).

**Cost:** 2017-2018 MGS Membership Dues are \$30.  
Paid 2017-2018 MGS Members receive a \$5 meeting discount on the meal costs listed above.  
The cost for full-time students is \$10, payable to MGS at the door.

**Reservations:** Requested by noon, Friday, October 6th, 2017
